

ALBIS ADDITIVE BATCH PE SL A 10-2928 (ESA)

ALBIS ADDITIVE BATCH PE SL A 10-2928 (ESA) is used for lubricant applications of polyolefine for extrusion and injection molding parts.

Composition

ALBIS ADDITIVE BATCH PE SL A 10-2928 (ESA) included as active substance an organic lubricant. The base material polyethylene (LDPE) shows following technical data:

Density	0.926 - 0.930 g/cm ³
MFI 190/2.16	3.4 - 4.6 g/10 min

Application

By adding of ALBIS ADDITIVE BATCH PE SL A 10-2928 (ESA) to not containing and to containing lubricant polyolefines the anti-friction properties of films can be adjusted corresponding to the requirements.

An addition of each 1 % ALBIS ADDITIVE BATCH PE SL A 10-2928 (ESA) leads to increase of slip agent concentration in final product of each 200 ppm.

The optimal dosage needs to be determined by the manufacturer.

Special formulation

For special applications this BATCH is also with higher or lower active substance content available.

Delivery Form

cylindrical pellets

Storage

ALBIS ADDITIVE BATCH PE SL A 10-2928 (ESA) has to be stored in closed bags. It has to be protected against direct sunlight and high temperatures and should be stored in cool, dry areas. Disadvantageous storage conditions (high temperature, high humidity) can cause the condensation of moisture. In this case pre-drying of the granules is recommended. Under normal storage conditions the storage life is six months.

Packaging

25 kg PE bags
