

ALBIS ADDITIVE BATCH PP A CONTRASTING AGENT

ALBIS ADDITIVE BATCH PP A CONTRASTING AGENT offers a finish of natural polypropylenes for optical production control by UV light.

Composition

ALBIS ADDITIVE BATCH PP A CONTRASTING AGENT include as base material an easy flow polypropylene lower density and an effective UV light contrasting agent.

Application

ALBIS ADDITIVE BATCH PP A CONTRASTING AGENT improve the contrast proportion on edges of transparent materials.

Like all surface active additives ALBIS ADDITIVE BATCH PP A CONTRASTING AGENT may affect the printing, bonding and weldability properties. Priliminary tests are recommended in case of critical applications.

Dosage

For films and injection moulding parts an addition of 1 - 3 % ALBIS ADDITIVE BATCH PP A CONTRASTING AGENT is recommended. The optimal dosing needs to be determined by the manufacturer.

Toxicology

Due to the migration of the contrasting agent to surface of the granules a direct contact with the contrasting agent is possible. Please observe the safety instructions in the Material Safety Data Sheet.

Delivery Form

cylindrical pellets

Packaging

25 kg PE-bags
