

Candidate List of SVHC Substances according to Art 59 Regulation (EC) No 1907/2006 REACH as amended on February 4, 2026

In accordance with Article 33 (1) of REACH, any Substances of Very High Concern (SVHC) according to the current Candidate List (<https://echa.europa.eu/de/candidate-list-table>) present in concentrations above 0.1 % w/w shall be identified in Section 15.1 of the Material Safety Data Sheet (MSDS) or Information Data Sheet (IDS) for grades of the following product groups manufactured by **MOCOM Compounds GmbH & Co. KG** in its European production sites:

ALCOLOR	ALCOM	ALFATER XL
ALPERFORM	ALTECH	CELLÍDOR
LUPOLEN Concentrate	SHELFPLUS	TEDUR
WIC	WIPAFLEX	WIPELAST

Each customer in the EU will automatically receive the updated MSDS / IDS from our company, given that they have been supplied with the relevant product within the last 12 months. If the product contains no new SVHC above 0.1 % w/w, the MSDS / IDS will not be updated. The document will be automatically sent to the contact person stored in our system. Please ensure that the contact details we have on file are up to date and contact your MOCOM Sales Representative if there are any changes.

The SVHC Candidate List is updated semi-annually. However, there is no legal requirement to update the MSDS / IDS every six months if there have been no significant changes to its content.

Please understand that checking the formulations for SVHC and processing the MSDS / IDS takes some time. Once processing is complete, the MSDS / IDS will be sent to you in a timely manner, as described above.

Annex XVII of Regulation (EC) No. 1907/2006 (REACH) lists the substances whose manufacture, placing on the market or use is restricted or banned in the European Union. Information on Annex XVII as well as SVHC already included in **Annex XIV (Authorization List) of Regulation (EC) No. 1907/2006 (REACH)** can be found in Section 15.1 of the respective MSDS / IDS.
