

MOCOM

Altech® ideas4compounds

Altech® represents a comprehensive portfolio of plastic compounds tailored to the most diverse material requirements. In addition to a wide range of high-performance core products, we develop individual solutions tailored to your product ideas and requirements.

Our core portfolio offers a wide variety of material properties and includes PA 6, PA 6.6, PP, ABS, PBT, PC and PC blends as well as many other polymers. To achieve the properties you expect from high-performance compounds, we use a comprehensive range of fillers and reinforcing material as well as the latest additives to stabilize our compounds against a multitude of external influences. Of course, our portfolio offers a high level of approvals and listings, such as UL or RoHS - so you are always on the side of safety.

Does your application require special properties? If so, we are happy to take up the challenge and develop customized material that meet the requirements of your project. Individual color developments are possible as well as the specific adjustment of mechanical characteristics

or other properties. Take advantage of the comprehensive range of our portfolio to successfully implement your projects. In addition, we offer intensive support from our Technical Service Center with application engineering advice, tool simulations and much more.

Altech®: the advantages at a glance

- PA 6, PA 6.6, PP, ABS, PBT, PC, PC-Blends, etc.
- Strong core portfolio
- High level of approvals and listings (e.g. UL)
- Large selection of fillers and reinforcing material
- Color matching (RAL, Pantone, individual template)
- Tailor-made customer developments
- Latest additive technologies for stabilization

Our competence for your application

With these „jigsaw pieces“ we developed more than 3,000 individual recipes using state-of-the-art methods such as Design of Experiments or Design Thinking.
