Preparations for Brexit

Dear Sir or Madam,

As widely reported in the media, the detailed terms under which the UK will leave the EU are not yet finalised. In particular, it is not yet clear if a so called "hard Brexit" will result, i.e. the UK leaving the EU without formal customs or trading agreements in place.

As a contingency for a hard Brexit, we are working on ways to transfer the materials produced exclusively at our facility in Knutsford, UK to our plants in Germany. Should there be individual cases where this is not feasible, supply to the continental European market will continue to be assured, although such supplies may be subject to customs clearance - with all the related consequences.

Furthermore, for the compounds manufactured in Germany which contain ingredients supplied from the UK, we are able to obtain these from alternative sources or stockpile them in order to minimize and even eliminate potential delivery delays which may result from any impending customs clearance.

Our distribution partners are also actively preparing for Brexit and its potential consequences and are taking necessary steps to secure their supply chains.

Nevertheless, neither we nor our partners and suppliers are in a position to guarantee that there will be no delays or even interruptions in supply. In such cases, we will of course inform you in a timely manner and discuss alternative solutions.

Yours faithfully
ALBIS PLASTIC GmbH
